

Efficiency in Action

LEARN HOW **SHARP HEALTHCARE** USES **CANCERIQ** TO OPERATE THREE CANCER CENTERS IN SAN DIEGO, WITH TWO FULL-TIME GENETIC COUNSELORS SERVING ALL THREE.

After switching to another digital vendor, Sharp Healthcare was still struggling with patient access, specialist productivity, and documentation. Only 51 percent of patients completed the intake forms, and even though they had a digital pedigree creator, it didn't allow for live edits, negating whatever time savings it would have offered. Similarly, that solution did not provide templates for notes and documentation, creating redundancies that bogged down the workflow with repeatable tasks.

After switching to CancerIQ's digital tools, which supported all of these needs, Sharp Healthcare experienced a more robust, efficient and effective program.

This goes to show that not all digital solutions are created equally.
